FROM THE **TRAINER**

Understanding Financial Statements: Learn to decode income statements, balance sheets, and cash flow statements – the cornerstones of company analysis.

Financial Ratios and Metrics: Master key financial ratios like P/E Ratio, Debt-to-Equity Ratio, and Profit Margins, to assess a company's profitability, solvency, and efficiency.

Industry Analysis: Understand the key drivers of different sectors and identify opportunities within them.

Company Valuation Models: Learn popular valuation models like Discounted Cash Flow (DCF) and Price-to-Earnings (P/E) Ratio to estimate a company's intrinsic value.

Building Your Investment Thesis: Develop a framework for researching companies, analyzing their competitive landscape, and making informed investment decisions.

Remember, the share market can be dynamic, but understanding the fundamentals can give you a solid foundation for success.

FROM THE TRAINER

Charting Basics: Master the language of charts – learn to read different chart types, identify key support and resistance levels, and understand candlestick patterns.

Technical Indicators: Demystify popular indicators like moving averages, MACD, and RSI, and learn how they can help you gauge market momentum and potential reversals.

Trend Analysis: Identify uptrends, downtrends, and consolidation phases to time your entries and exits effectively.

Trading Strategies: Develop a robust technical trading strategy by combining different indicators and patterns.

Risk Management Techniques: Learn to manage risk effectively using stop-loss orders and proper position sizing.

Remember, the market is dynamic, but technical analysis can help you navigate it with greater confidence. I'm committed to making this course interactive and practical. Don't hesitate to ask questions, share your observations on real-world charts, and test your newfound skills.
